## Profile

---

Passionate backend developer with over two years of professional experience building scalable, cloud-based systems using **NestJS**, **FastAPI**, **AWS**, and **Docker**. Strong foundation in distributed systems, serverless architectures, and event-driven design. Eager to grow in cloud-native and LLM-based software development under expert mentorship.

## Skills

---

**Programming Languages:** TypeScript, JavaScript, Python

**Frameworks:** NestJS, Express.js, Node.js, FastAPI

**Messaging Async:** RabbitMQ, BullMQ (Redis), Event-Driven Architecture

**Databases:** PostgreSQL, Redis, MongoDB, MySQL

**Cloud DevOps:** AWS (Lambda, S3, EC2, CloudWatch, SQS), Docker, Nginx, GitHub Actions (CI/CD)

**Architecture:** Microservices, Serverless, API Gateway, Design Patterns (Facade, Repository)

## Experience

---

**Software Engineer**, Bitbyte Technology – Dhaka, Bangladesh April 2025 – Present

- Optimized campaign execution for Anzaar Lifestyle (E-commerce POS) from approximately 2 minutes to under 1 second.
- Designed and implemented discount card product review features, increasing engagement.
- Built advanced reporting modules (purchase, transfer, summary) to empower data-driven business users.
- Developed backend for ExportBangladesh.org (Govt. of Bangladesh World Bank EC4J project) using FastAPI.
- Created distributed backend services for bitcommerz SaaS using NestJS, RabbitMQ, and Redis for asynchronous workflows.
- Built standardized helpers for API responses and pagination, improving developer efficiency.

**Jr. Software Engineer**, Relaxy – Dhaka, Bangladesh May 2023 – April 2025

- Built subscription modules for bKash, Bdapps, and GP, driving B2B business growth.
- Migrated 25,000+ users from Firestore to MongoDB using Dockerized microservices and cron jobs.
- Re-architected Firebase backend to NestJS, improving performance and reducing Firestore costs by 30%.
- Developed RESTful APIs for mobile apps and admin dashboards using NestJS, MongoDB, and AWS.
- Implemented expert call/chat session booking, promo code features, and integrated payment gateways.

**Jr. Software Engineer**, Ontik Technology – Dhaka, Bangladesh Feb 2023 – April 2023

- Optimized Laravel Eloquent queries with eager loading, improving API performance.
- Built real-time synchronization between Daraz and WHM systems using Laravel cron jobs.
- Developed Git-based FTP deployment automation pipelines.

## Education

---

**Khulna University**, Bachelor of Science in Physics Jan 2017 – Apr 2022

- GPA: 3.33/4.0
